

Create unique feeding **SIMULATIONS**

DrawTools is a digital illustration tool that describes and visualizes actual feeding scenarios in cage farming

Through interactive animations of feed availability, fish behavior, camera position and other situation-specific conditions, one can illustrate both opportunities and challenges one encounters through a day of feeding.

DrawTools is not only an attractive tool for the industry, but also for academic purposes – universities, learning programs, exhibition centers and more.

With a wide area of use, one can illustrate actual feeding scenarios to increase awareness and knowledge. With DrawTools you can simplify complex situations and challenges you may encounter during a feeding day, such as conditions in the sea, the position of the fish, amount of feed, spread and more.

Simplification of reality
